

# Annual Summary Report – Home Sharing

December 2018

As part of Yellowhead Community Services performance measurement plan, annual surveys were distributed in person to all home share providers and individuals residing in a home share living arrangement. A four point scale was used for home share providers and a three point scale was used for individuals receiving service. Individuals receiving service and providers were given the option of completing surveys during monitoring visit or to mail back at a later date. Addressed envelopes were provided. The survey return rate was 100% from home share providers and 75% from residents.

## How We Did

<b>Program Effectiveness</b>	
<b>Efficiency</b>	
<b>Service Access</b>	
<b>Feedback/Satisfaction</b>	

### Summary/Recommendations:

The home share program has met all of our target goals this year. YCS currently has 4 approved homes with 5 providers. Recruitment of new homes continues to be an ongoing struggle as few people have expressed interest in becoming a provider. There were three individuals who expressed an interest over the last year, none of which were suitable.

In 2019, we will continue to be looking for home share providers in our area, but will also be looking at alternate housing/living arrangements. With the new apartment complex being constructed, we have been in discussion with CLBC regarding a cluster program which would see a few of CLBC funded individuals in need of housing residing in their own apartments with shared staff support each week.
