

Annual Summary Report – Home Sharing December 2025

As part of Yellowhead Community Services performance measurement plan, annual surveys were distributed in-person to all home share providers and individuals residing in a home share living arrangement. Surveys have a four-point scale for home share providers and a three-point scale for individuals receiving service. Participation was voluntary, and individuals had the option of remaining anonymous. Home share providers and individuals receiving service could mail with addressed envelopes or drop off the survey at the office. The survey return rate for the home share providers included in the survey process was 100% and the survey return rate for individuals was 100%.

How We Did

Program Effectiveness	
Efficiency	
Service Access	
Feedback/Satisfaction	

Summary/Recommendations:

The Home Share Program met or exceeded all established performance targets during the reporting year. Yellowhead Community Services currently has five approved home share providers supporting six individuals, with one provider supporting two individuals within their home.

The program continues to be promoted through social media, community bulletin boards, and postings on the WorkBC and Yellowhead Community Services websites. A two-week social media campaign conducted through Black Press generated interest from four potential home share providers. In 2026, the program plans to host two Home Share information sessions to further support recruitment efforts.

Recommendation:

The Program Manager will continue to assess and implement effective strategies to recruit home share providers within the community.
